KNITTING INSTRUCTIONS

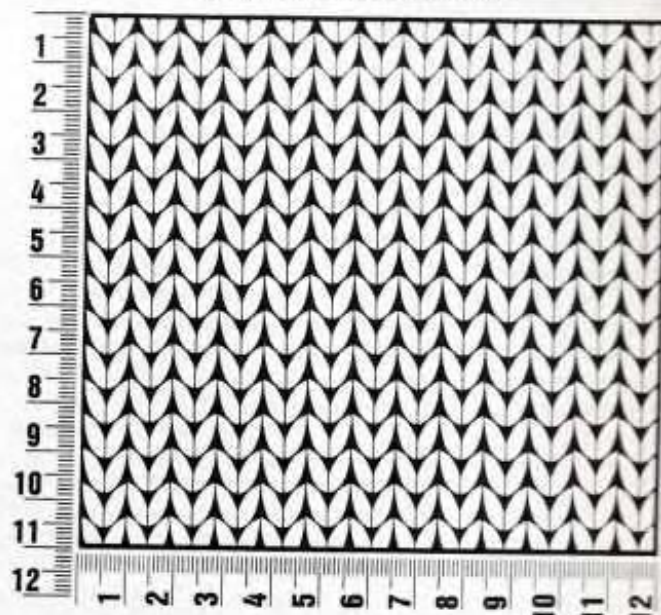

Make a gauge before you start! Work a gauge swatch of approx 12 x 12 cm (approx 4,7" x 4,7") in the pattern of your chosen model. Count the stitches and rows you need to work for a piece which measures 10 x 10 cm (approx 4" x 4"). If there are less stitches than given in the instruction: either increase the tension or use thinner needles (0,5 up to 1 needle size smaller). If there are more stitches: knit more loosely or use thicker needles.

Please note that each knitting project is different. Therefore the ball band instructions are not authoritative. They always refer to stockinette stitch. For a perfect result, a swatch worked in the pattern of your project is essential to make sure that your model of choice will not only look nice but it will fit nicely as well.
